

MORE LEAFY SPURGE CONTROL FOR YOUR MONEY

OUTPOST 22K is made by DOW and is a generic version of Tordon 22K. Outpost is identical to Tordon. It has the same label, the same active ingredients and the same EPA Registration #. Like Tordon it requires a RUP Certification License to purchase. Look for it at local dealers. Compare prices and you will find a savings of as much as \$40/gal for Outpost vs. Tordon.

Overdrive is a herbicide that mixes well with Outpost or Tordon and gives outstanding spurge control. The recommended rate is 4oz Overdrive + 8-16oz Outpost (Tordon) + NIS (1qt/100gal). One year after treatment, trials have shown spurge reduced 86-95%.

A **Plateau** three-way mix has shown 83% spurge control one year after treatment. The mix of 4oz/A Plateau + 16oz/A Outpost (Tordon) + 32oz/A 2,4-D + 32oz MSO/A is recommended as a spring treatment. In the fall, Plateau at 8oz/A + 32oz MSO/A is recommended. Plateau does not require a RUP certification to purchase. Plateau is available from the Bottineau County Weed Board in 1 gallon containers for **\$116.25/gal**.

Always calibrate your equipment and use labeled rates; over application may damage grass.

Pre-Season Order for Plateau

Cost-share can only be paid to the person named on the receipt. Place your order early to avoid delays; please include payment with order. Thank you.

Name: _____ Tel: _____

Address: _____

I wish to order _____ gals of Plateau@ \$116.25/gal. (one gallon containers) Total of \$ _____
